

Controls Products

Description

Rogerson Aircraft Controls has been a leader in the valve and control business for over 30 years. Its current focus is to commit itself to aircraft-wide system improvements. Included in Rogerson's capabilities are the latest generation de-icing systems as well as the most effective, affordable lavatory blue-ice solution. These achievements continue to keep the Controls Division a leader in its market segment.

Rogerson Aircraft Controls also supplies a multitude of qualified pneumatic and fuel valves to military and commercial aircraft manufacturers. This valve technology coupled with Kratos fuel quantity measurement systems, gives Rogerson a product line unmatched by others.

Market

- Commuter Aircraft
- Military Aircraft
- Helicopters
- Transport Aircraft
- General Aviation

Current Product Lines:

- Air Pressure Regulators
- Solenoid Valves
- Fuel Shutoff Valves
- Water Separators
- Air Shutoff Valves
- Fuel Pressure Regulators
- Check Valves
- Fuel Level Switches
- Flow Sensors
- Pilot Valves
- Distributor Valves
- Refueling Valves
- Air Bleed Valves
- Pre Coolers
- Directional Control Valves
- Vent Valves

Programs Include:

B-1	222V
B-2	214ST
A-10	CH53
L-1011	SF340
F-15	CN235
E-3A	DO328
F-27	C9B
F-18	B737
C-130	MD11
